## Tutorial

### Health/Money

You start with 100 coins and health each round. You earn coins by defeating chickens and spend it on towers/upgrades.

Health is depleted when a chicken reaches the castle and cannot be regained. If it reaches 0, you lose.

### Chicken Types

The normal chicken is the most common, and most average chicken, with no special abilities.

The camo chicken is rare, but fast, and requires an upgraded tower to be able to detect.

### Chicken Types

The metal chicken is very rare, has a lot of health, and requires a tower upgrade to be able to bubble or damage.

The boss chicken is the scariest of all! Boasting a ton of health, and cannot be bubbled!
